

Hello Professor,

I'm Monica Morris, an HR Representative at General Dynamics Land Systems in Sterling Heights, MI. I've reached out to you in the past notifying you of different position openings.

I'm emailing to help get the word out on a position opening of an "Entry Level Application Developer" SHC-LB-17-20024 at our Sterling Heights, MI office. Feel free to notify graduated students of this opportunity. Our website is www.gdls.com

Thanks!

Click on "careers" then "Find a job" which would open a new page where you can search for job postings. For the requisition number if you search the "20024" then the Entry Level Application Developer position would appear. Or you could search all postings by just clicking on a specific location.
